

Orchidea selvatica (ophrys sphegodes) di P. D'Auria

<http://digilander.libero.it/origamidauria>

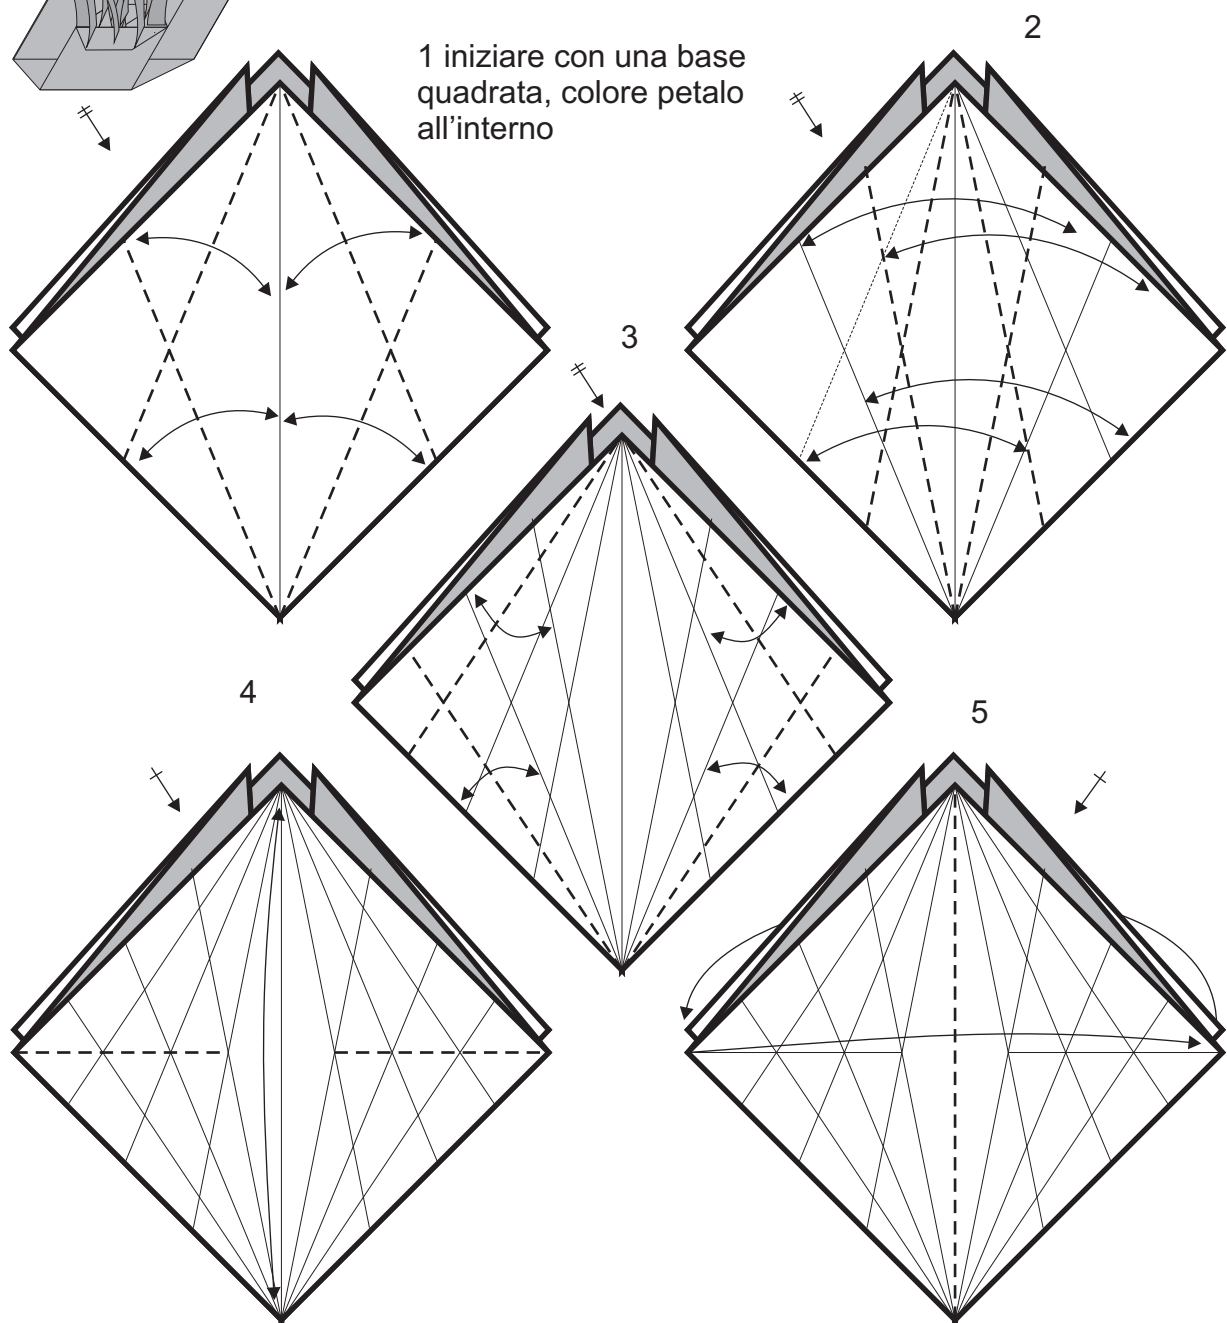

Fiore $L \times L$ misura consigliata 7,5 cm, un lato verde e uno colore petalo.

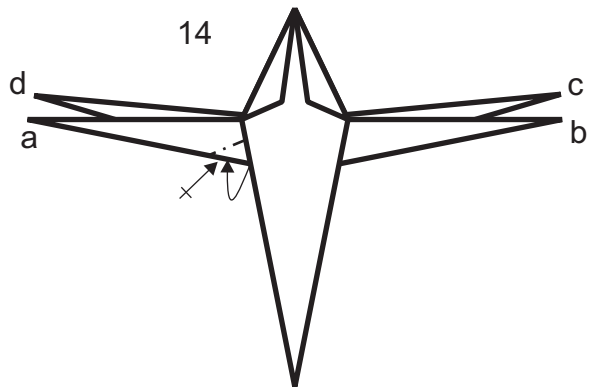

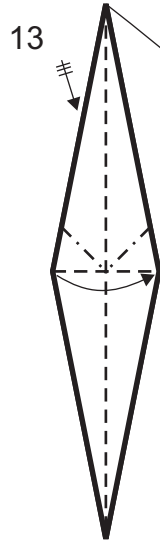

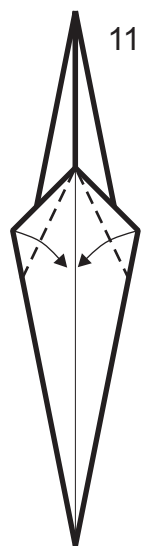

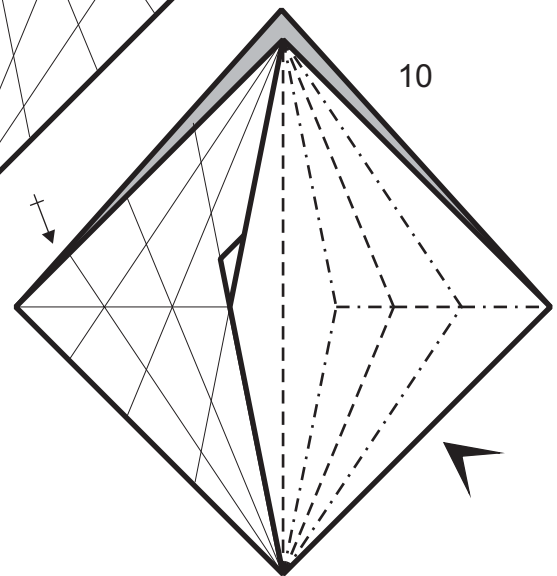

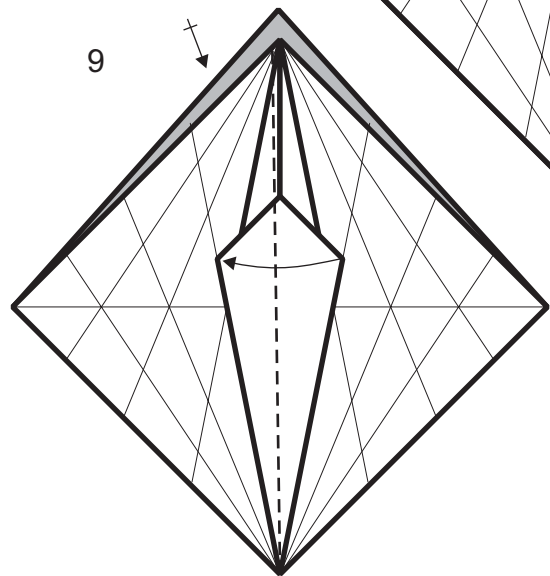

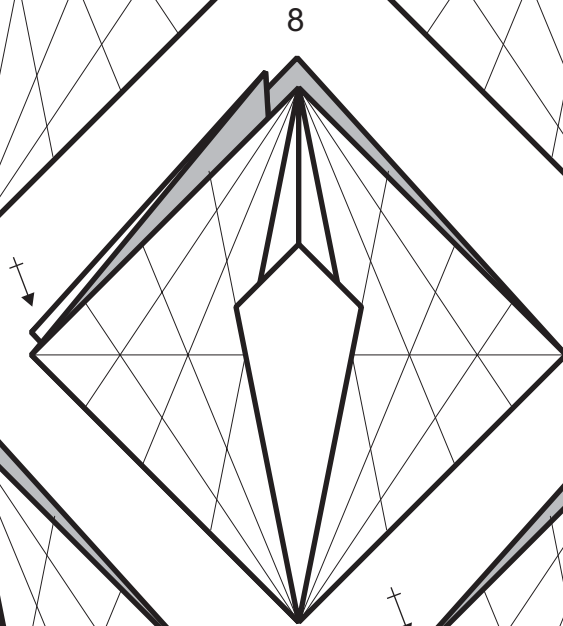

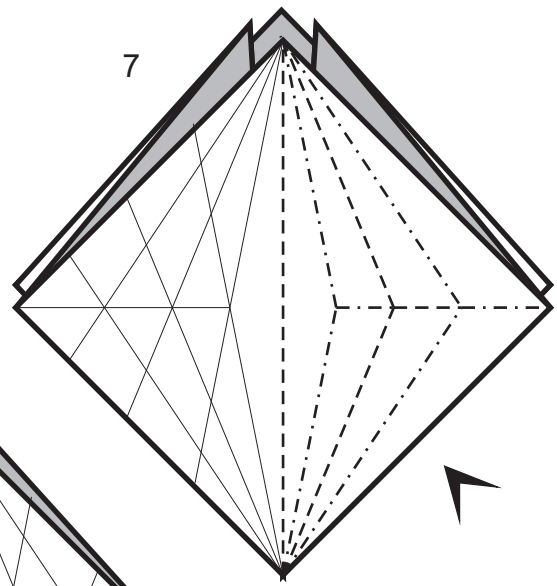

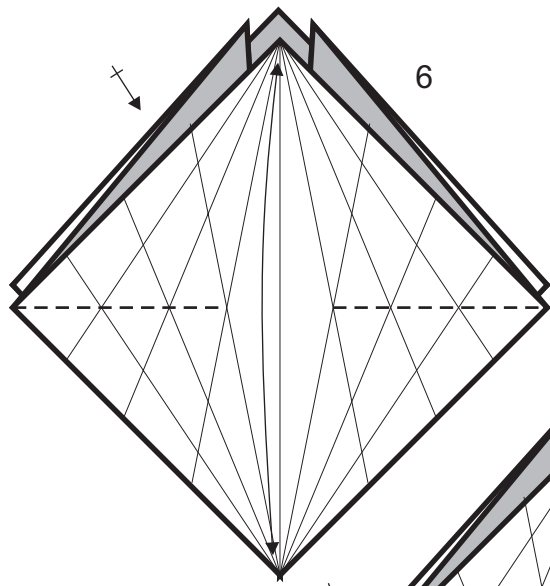

Erba $4L \times 4L$ misura consigliata 30 cm, tutto verde.

Foglia $L \times L$ misura consigliata 7,5 cm, tutto verde.

Stelo $L \times 4L$ misura consigliata 7,5x30 cm, tutto verde.

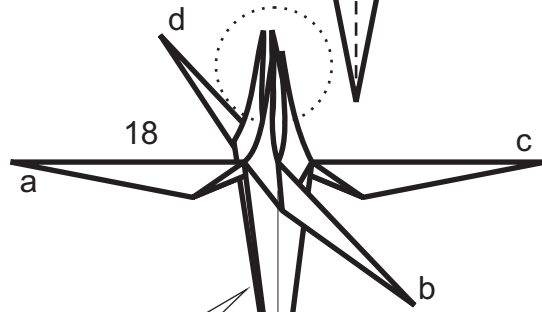

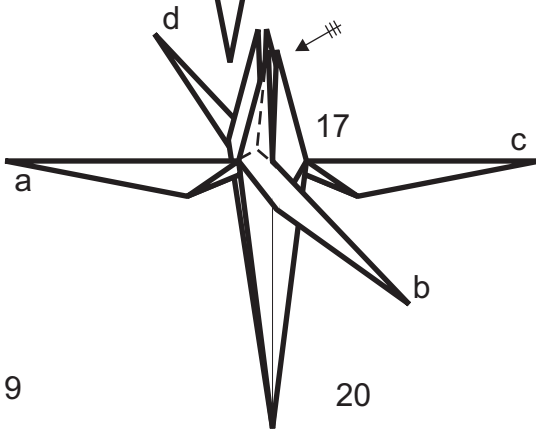

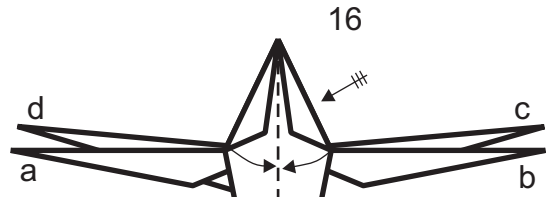

Fiore

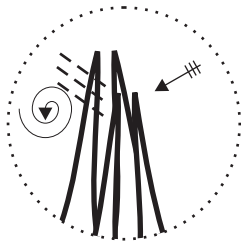

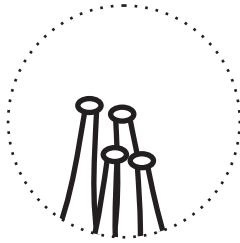

15 ripetere solo sulle punte b c, la punta d deve restare diversa dalle altre

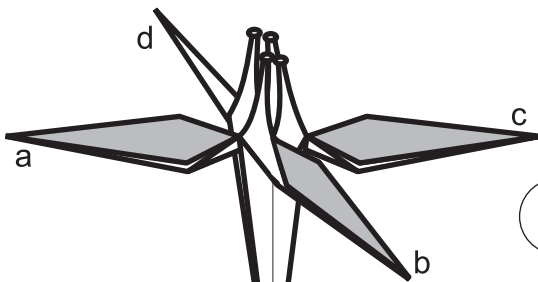

19

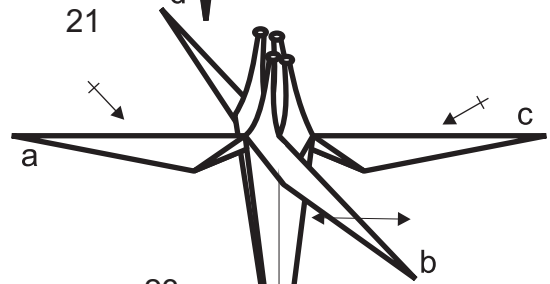

20

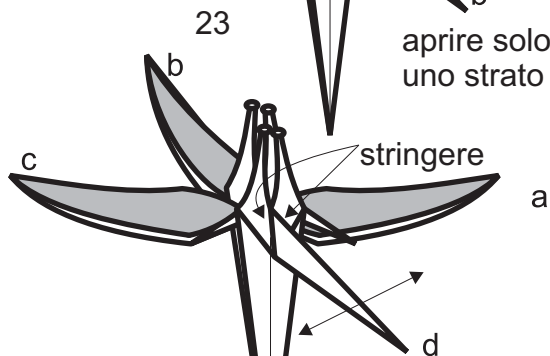

22 modellare i petali

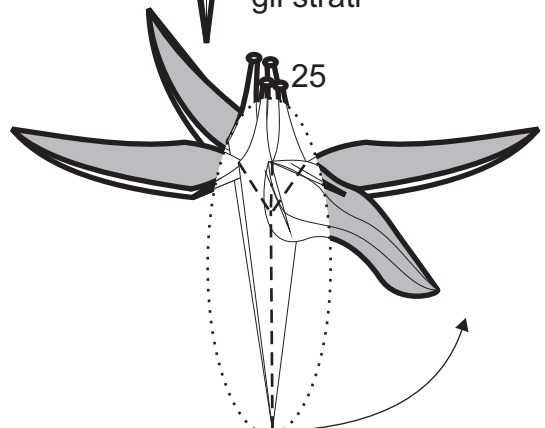

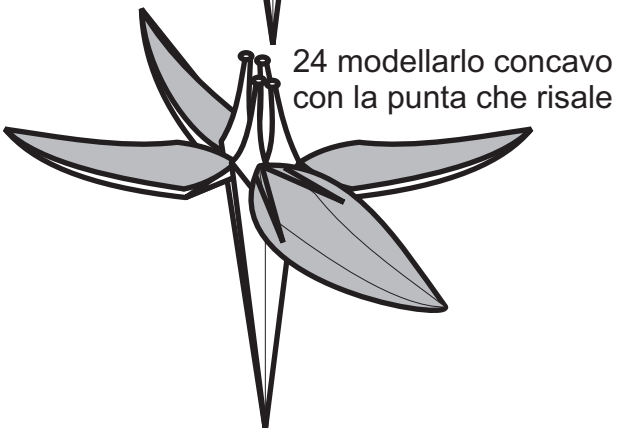

21

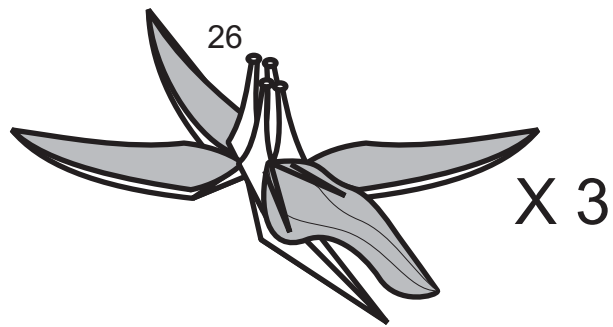

aprire solo uno strato

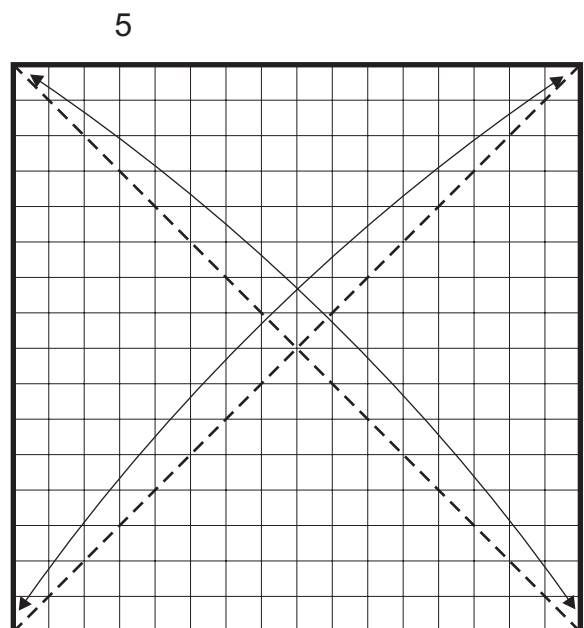

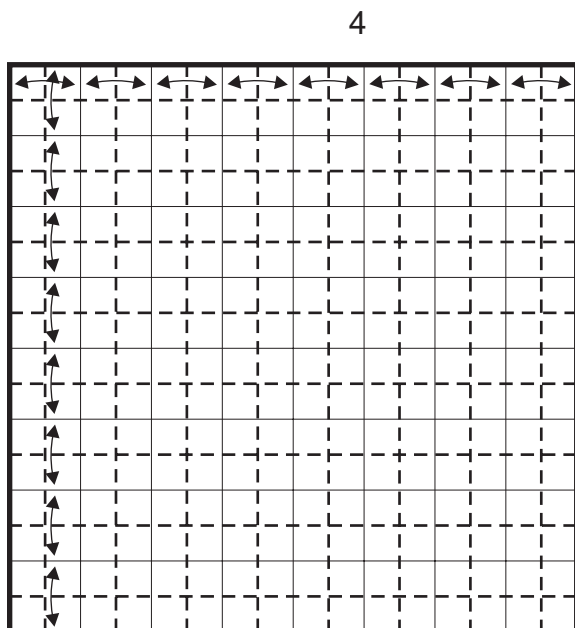

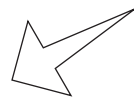

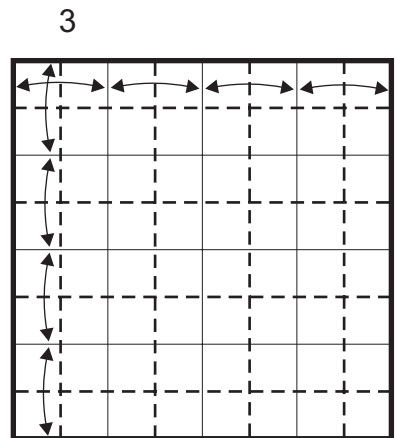

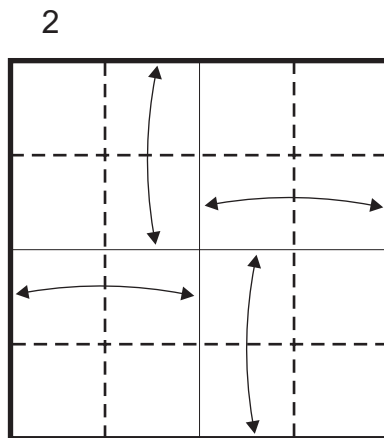

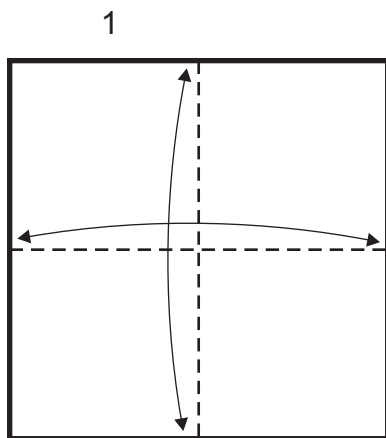

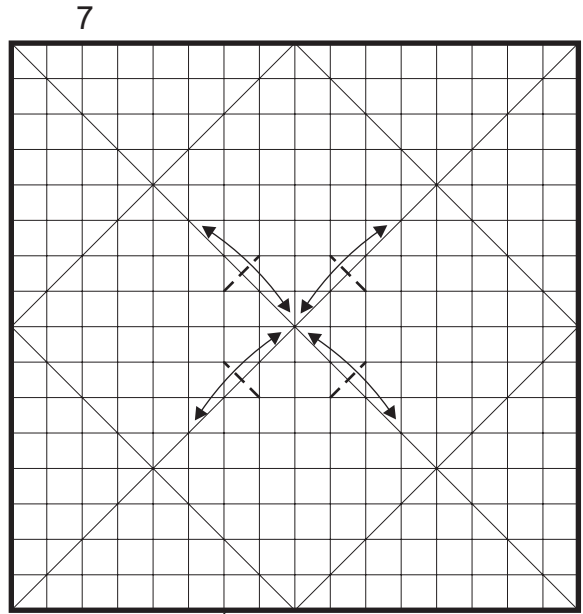

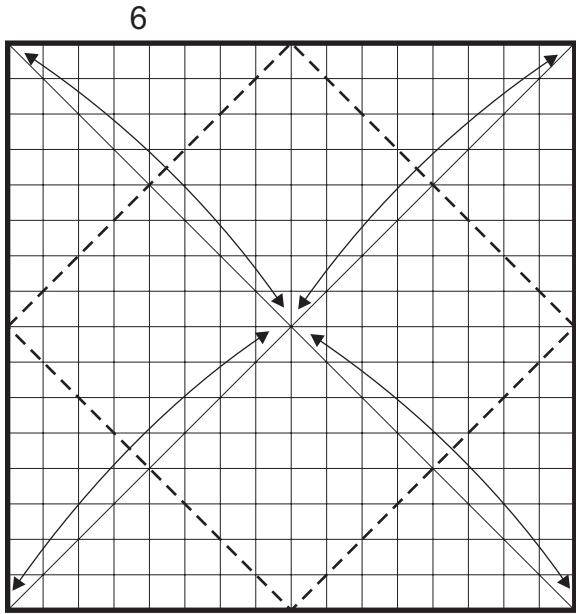

aprire tutti gli strati

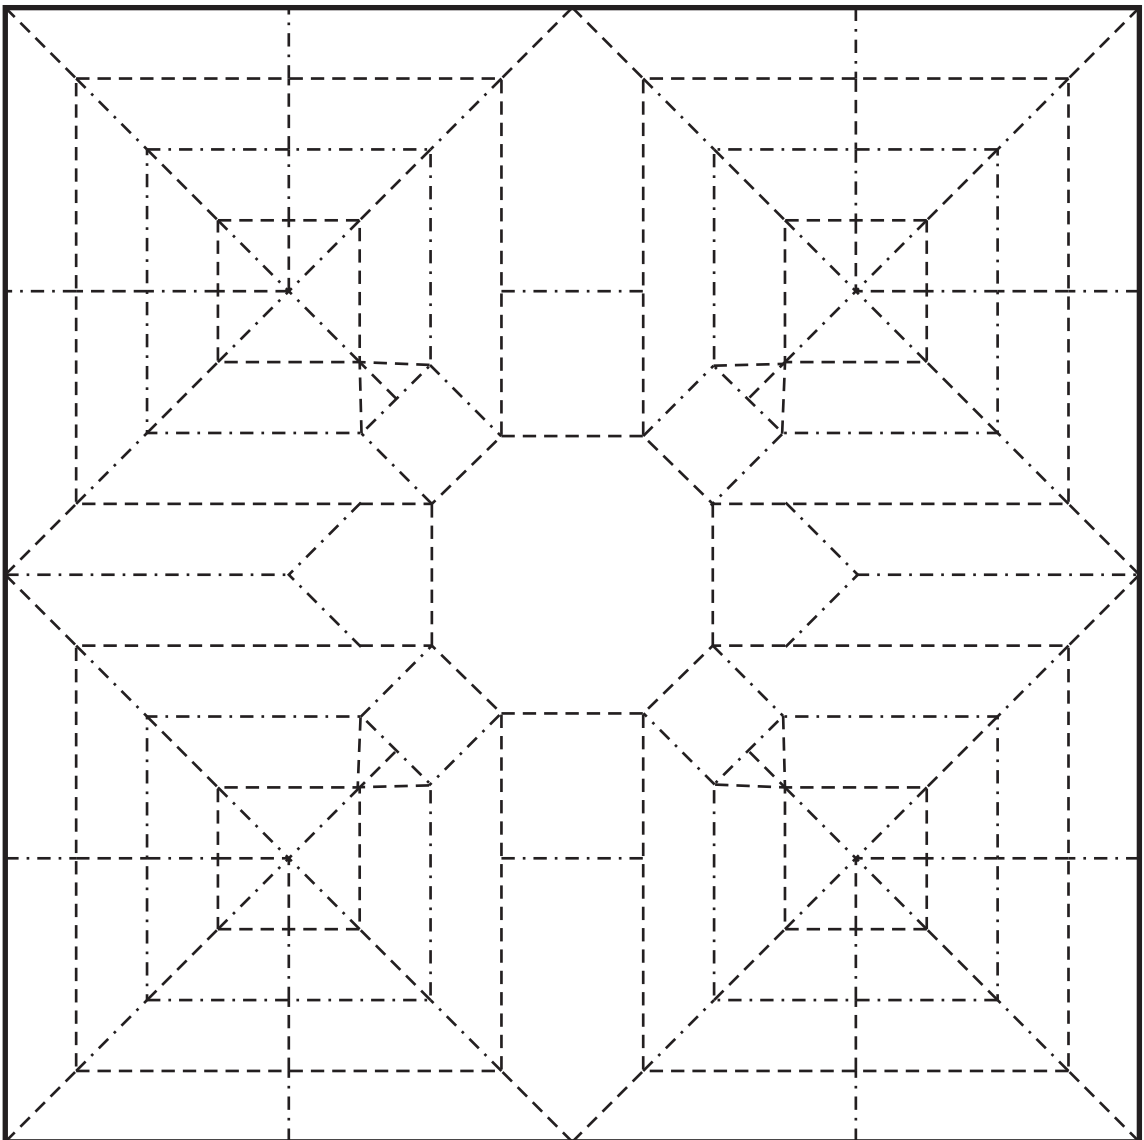

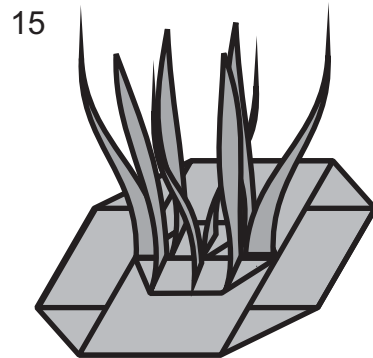

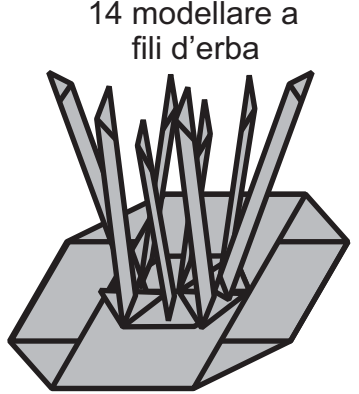

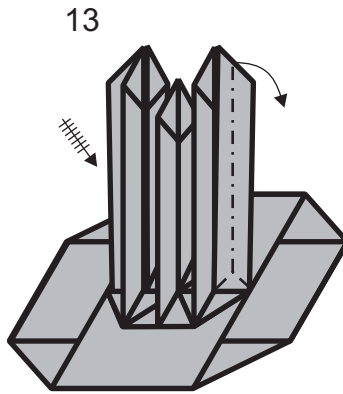

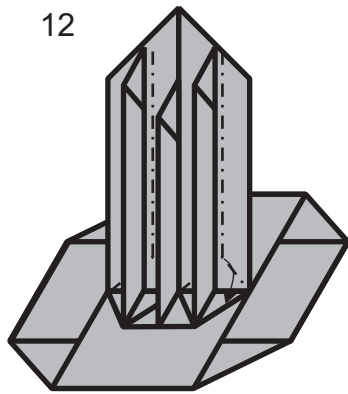

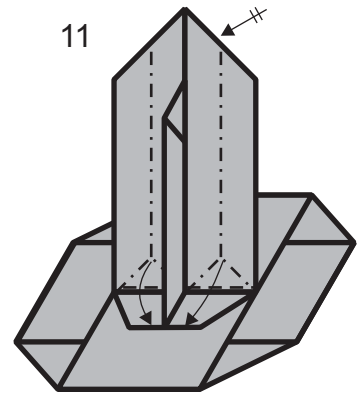

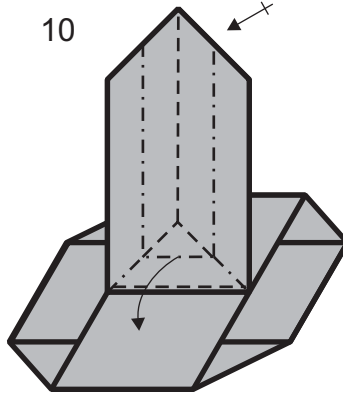

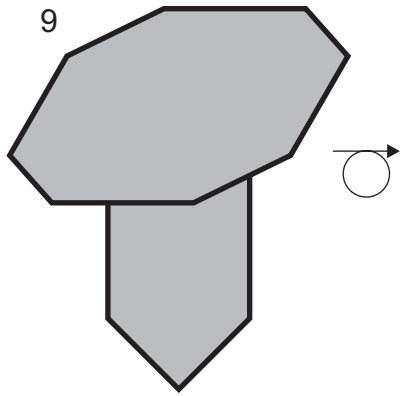

Erba

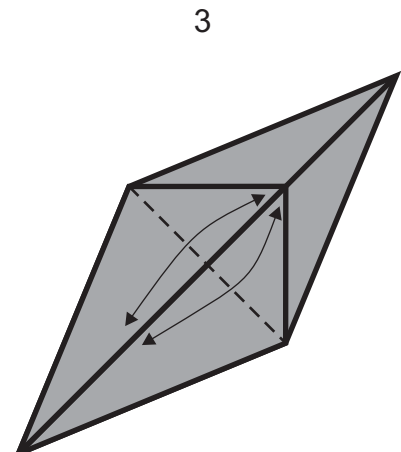

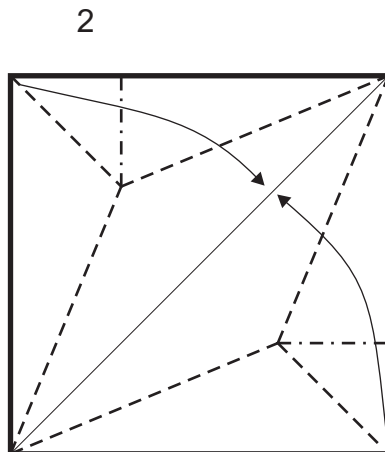

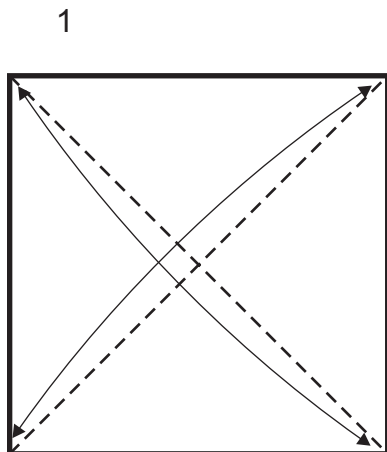

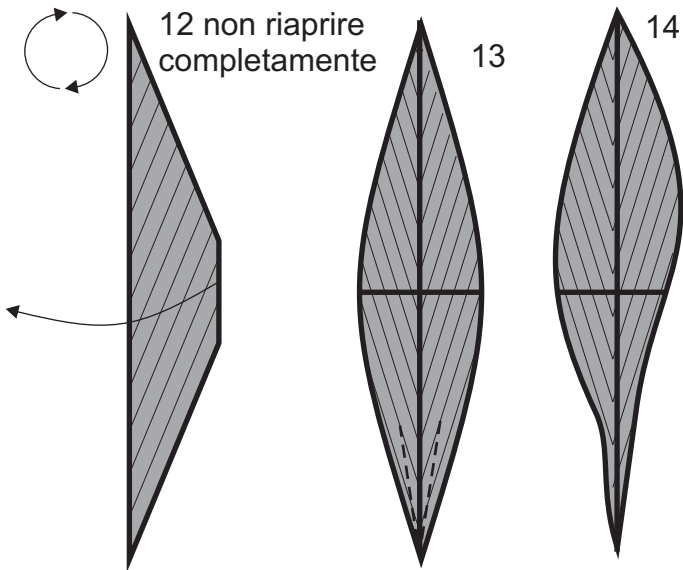

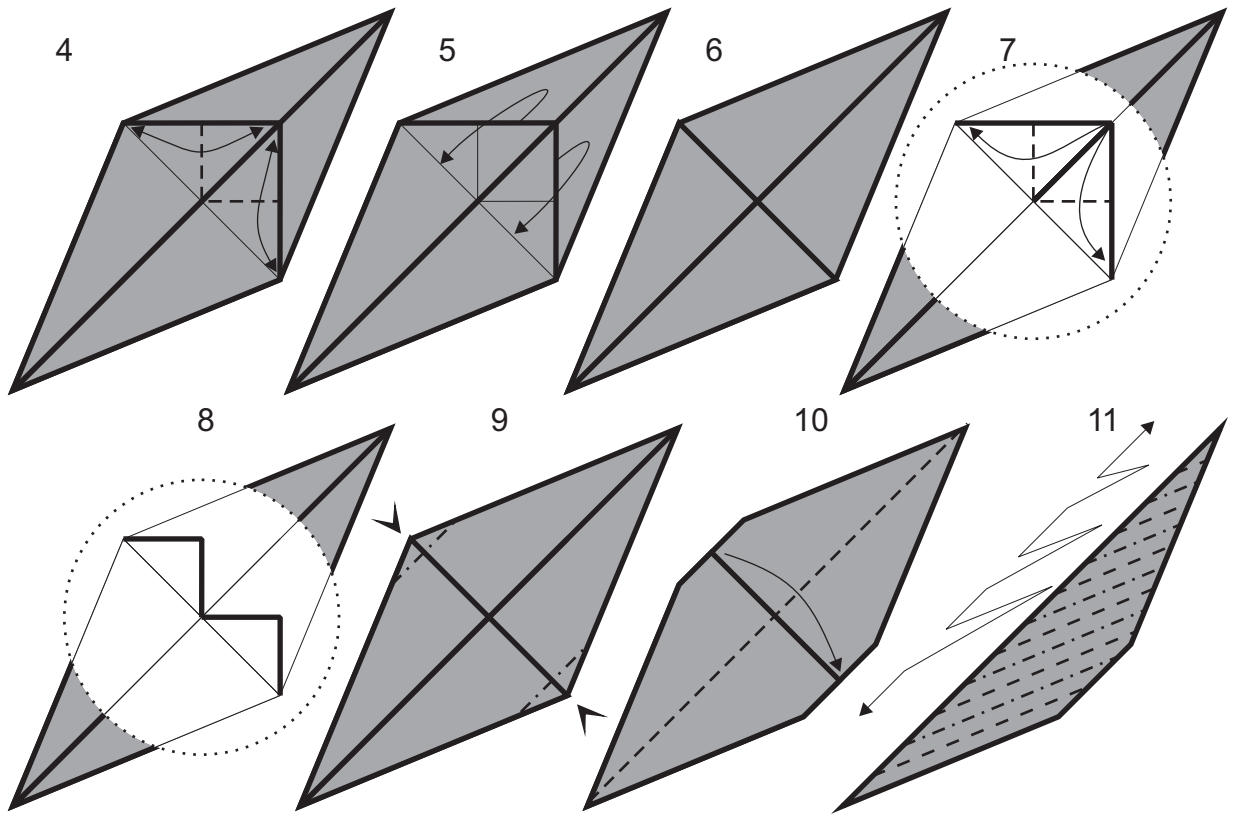

8

Foglia

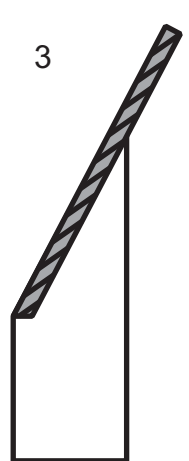

Stelo

2 riaprire 3/4

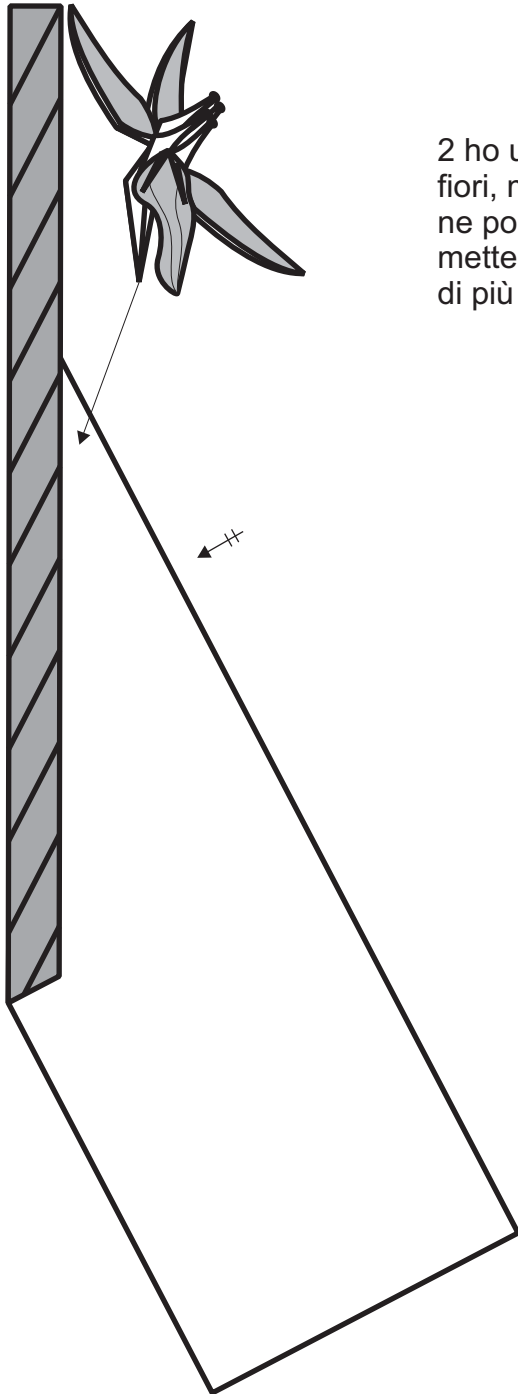

1 arrotolare

3

Montaggio

1 per rendere il tutto più solido si può usare dello scotch, ma non è indispensabile

2 ho usato tre fiori, ma se ne possono mettere anche di più

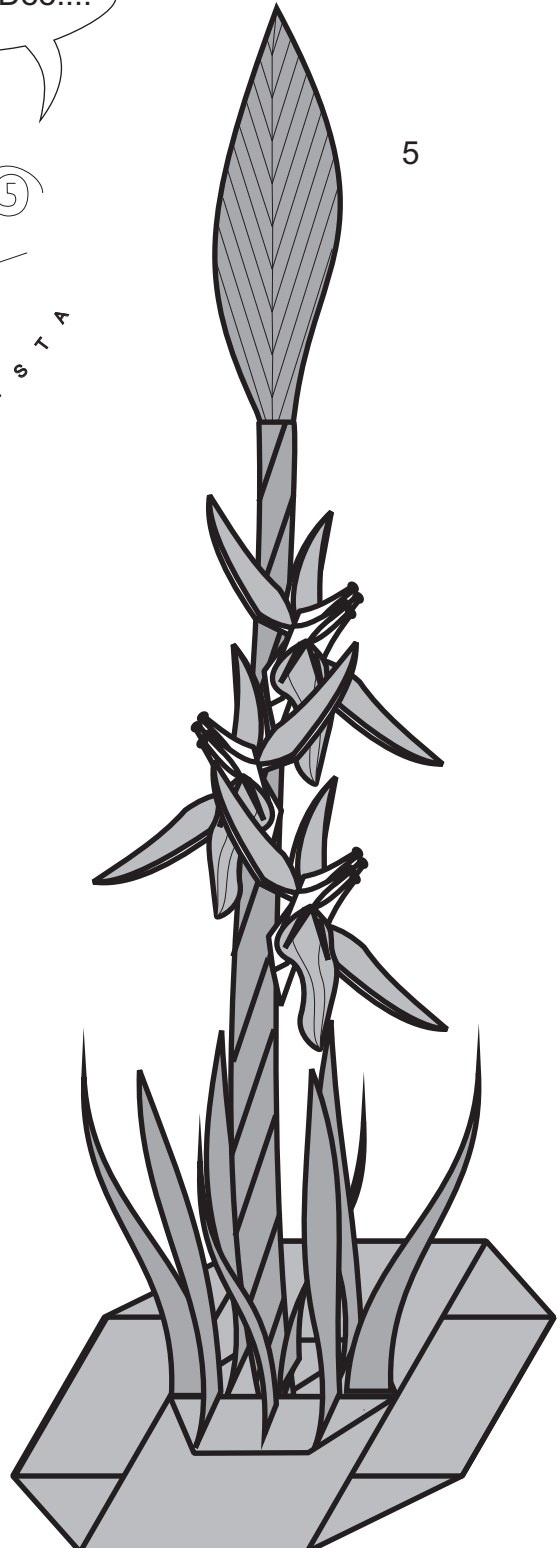

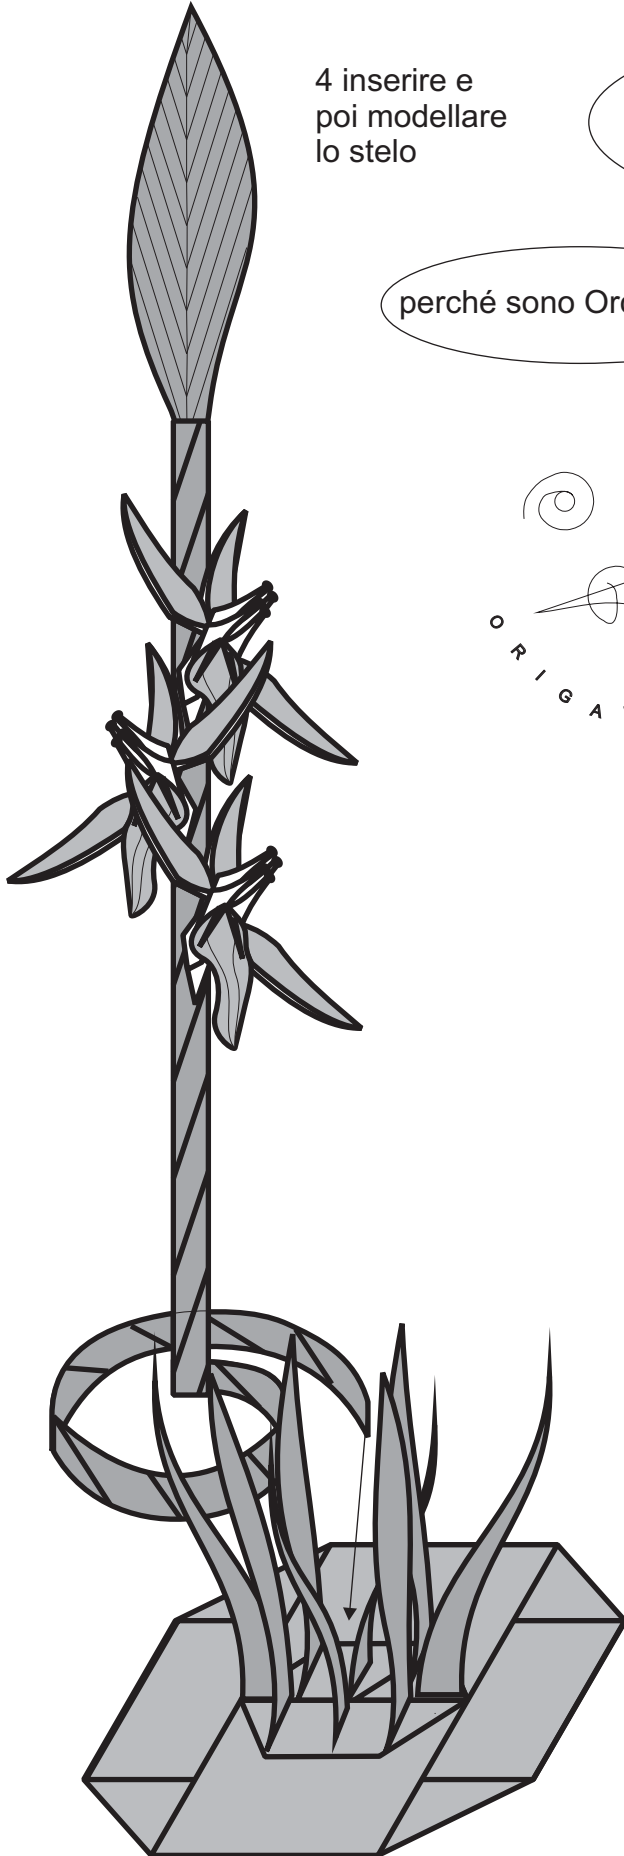

schacciare e arrotolare

4 inserire e
poi modellare
lo stelo

perché questi fiori dovrebbero
poter partecipare a un concorso
fantasy?

perché sono OrchiDee!!!!
