

# Stella marina (Hacelia attenuata) di P. D'Auria

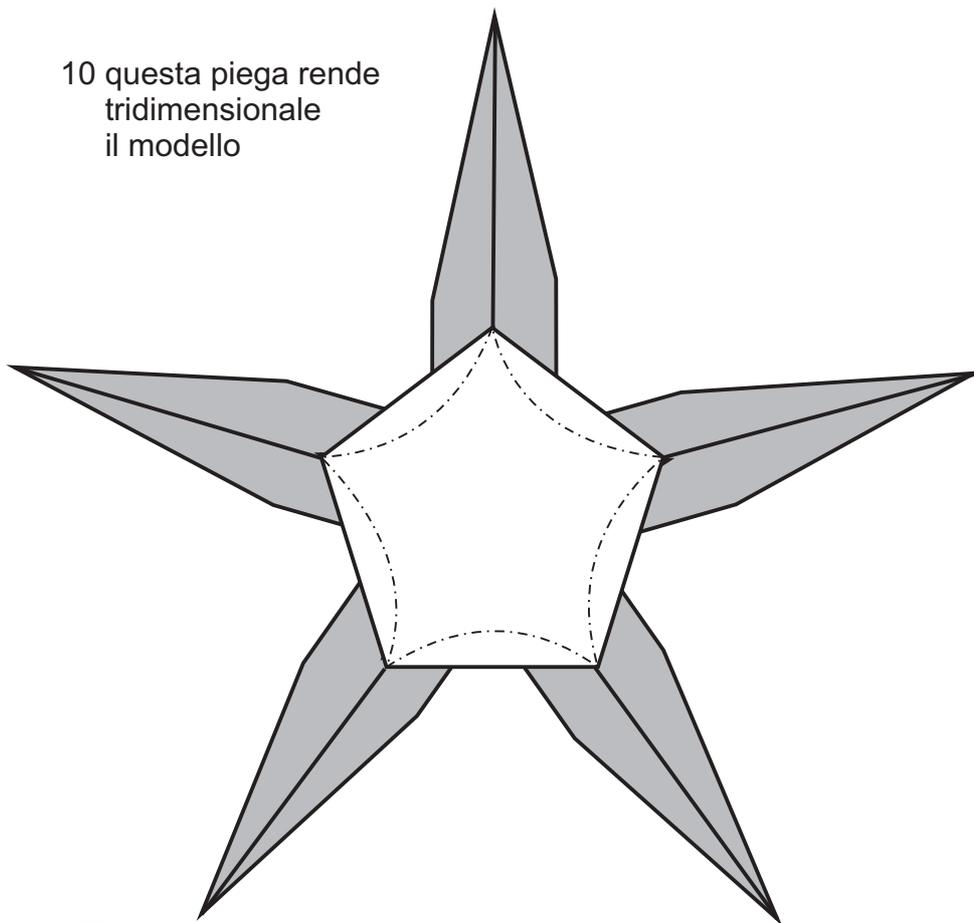

Partire con un foglio pentagonale,  
rosso su entrambi i lati

10 questa piega rende  
tridimensionale  
il modello

questo modello ha  
qualcosa di strano

vorrei vedere te, dopo essere  
stato piegato a valle e a monte  
e girato di qua e di là per un'ora

11 usando un foglio rosso su  
entrambi i lati, la stella sarà  
tutta dello stesso colore.
